

3rd eye knowledge foundation

About Us

3rd Eye Knowledge Foundation is an educational trust which strives to create a happy, healthy and secure childhood for the girl child in India by helping her avail formal education. The goal is to enable a Nanhli Kali blossom into a socially responsible adult who is aware of her rights and responsibilities. The foundation offers training and academic support services to all persons of caste, creed, religion and region. It maintains national character and serves on a pan India basis. Our students hail from every nook and corner of the country and even abroad also. The academic executive council of the foundation consists of luminaries responsible for the general development and maintenance of the foundation. Its vision is to develop as a unique educational foundation in the country and then move beyond the shores to neighbouring SAARC nations and even the African Continent, where hunger, poverty and illiteracy, rule the roost.

The foundation has identified that with the ever increasing pace of life, the ever changing economy, complex relationships, the secular trend of growth & overwhelming pressures, the subjective discomfort in people has increased by leaps and bounds. The general notion that the tolerance level of people is going down and so the stress levels are going up: stems from the fact that nowadays the pace of change is very rapid. The technology wired world is becoming more and more accessible and thus, the effect of one culture on the other is intensifying. The pressure of living itself is overwhelming. In the pursuit to catch up with the pace of change around us, we too are changing rapidly. The definitions of success and accomplishments are changing. In an effort to earn a little extra, to be little more, to possess a little more, we are compromising on the contentment of life. To cope up with ourselves, we then try and learn the techniques to manage ourselves better to be able to do more. It seems like we are living 48 hours a day and still pine for more.

Relaxation does not come to us by itself nowadays. We need to put in effort to relax. Some of us prefer yoga, some meditation, some medication & some alternative therapies. Counseling & Psychotherapy are one of these alternative therapies or ways to catch up with oneself, to see inwardly to reduce subjective distress and live life to its fullest.

The foundation under the guidance of Dr Raja Roy Choudhury has launched innovative career oriented professional certification courses/programmes in the field of Counseling & Psychotherapy.

3rd Eye Knowledge Foundation Certified Career Programmes

Master Behavioral Health Specialist Programme

Programme Content

The M.S. in Counseling & Psychotherapy Programme is divided into 2 semesters with one exam per year, each of which requires candidates to be able to critique relevant areas of knowledge and also demonstrate an awareness of ethical practice and issues of diversity.

Year 1

Personality Development
Psychology of Adjustment
Psychopathology
Techniques & Methods of Counseling
Family & Marriage Counseling

Year 2

3rd Eye knowledge Foundation Certified Barefoot Counselor's Programme

Programme Content

The art of eliciting information from the individual who approaches (Basic Counseling Skills)

Problem Solving Skills (dealing with individual student/child

Emotional and Behavioral problems in children & common mental illnesses in them

Mistaken goals for misbehaviors and handling them appropriately

Classroom Management

Addiction and its characteristics

Programme Objective

The Barefoot Counselor's Training Programme is an exciting offering for both teachers as well as parents to enable them get an insight in developing skills to deal with students and children. The preferred skills would be:

Making a student/child open up and share his/her problems

Communicate effectively with the student/child

Identify clearly the problems/challenges faced by the student/child

Share insights in helping the student/child adopt solutions to overcome problems/challenges

Programme Learning Outcome

The participants, be it a teacher or parent would be well equipped with the requisite skills to deal with their students/children in a more effective manner.

Since the students/children need guidance and support, their elders would henceforth have more strength, patience and endurance to support and provide them with an encouraging relationship which will help them gain clarity and insight into their life, the life that they want and deserve for themselves.

The training sessions are also safe and supportive to the personal growth and healing of the participants as they would learn the nuances of self- help techniques when they support the development of their younger ones.

Programme Methodology

Slides, Courseware, Audio-Visual Sessions, Interactive Sessions
